WORK NOTICE – 45 WESTMINSTER AVENUE SOUTH Excerpt of the safety and mitigation measures

It should be noted that every possible effort will be made to both ensure that the work is done safely and with the most minimal impact to the residents of the neighbouring properties and the Montreal West community. This will include the following measures:

- Installation of fencing across the entire perimeter of the site with dust control meshing;
- The conduction of engineering assessments of the neighbouring properties so as to identify any possible risk due to the vibrations caused by the work to be performed;
- Use of dust controlling (water spaying) equipment where required;
- Site surveillance by qualified foremen, structural and civil engineers
- Application of strict safety protocols and COVID-19 sanitary measures
- Presence of qualified signallers to ensure the safety of pedestrians and drivers and to control the entry and exit of trucks.
